

Alex Zeng

Mechanical Engineer · Boston, MA

☎ (978) 482-6082 | ✉ zeng.al@northeastern.edu | 🏠 a-zeng.github.io | 🌐 a-zeng

EDUCATION

Northeastern University

Boston, MA

Candidate for Bachelor of Science in Mechanical Engineering · GPA: 3.86

September 2019 - May 2023

- Awards: Dean's Scholarship, Dean's List (Fall 2019 – Fall 2022)
- Relevant Courses: ME Capstone, CFD, Robot Mechanics and Controls, ME Design, Controls, Materials
- Activities: Northeastern University Mars Rover Team, ASME, Pep Band, Wind Ensemble

WORK EXPERIENCE

Mechanical Engineering Co-op

Waltham, MA

Vicarious Surgical, Inc.

January 2022 - June 2022

- Expanded the overall reliability effort for future instruments with 9 unique testing projects
- Automated tensile testing data collection and analysis using Python (pandas, Matplotlib), streamlining the data analysis workflow and reducing processing time to 30 seconds
- Designed three custom arm subassembly test fixtures to isolate features on the arm prone to failure, permitting more iterative design on the arm without requiring a full arm to run testing

Junior Machinist I

Boston, MA

Northeastern University Machine Shop

September 2021 - Current

- Fabricated parts using CNC (HSMWorks) and manual machines to support over 100+ parts requests per semester
- Designed and manufactured custom tooling holders to reduce setup times
- Utilized multiple work coordinate systems (WCS) to reduce cycle time from 2 minutes to 15 seconds

Mechanical Engineering Intern

Boston, MA

Nextera Robotics

June 2021 - August 2021

- Prototyped and constructed a cost-effective, vacuum suction end-of-arm tooling for a 6DoF industrial robotic arm capable of lifting 4'x8' drywall sheets according to FEA and material mechanics calculations
- Sourced and compiled \$2,000 worth of mechanical and electrical components into BoMs for purchase

Reliability Engineering Co-op

Andover, MA

MKS Instruments, Inc.

January 2021 - June 2021

- Performed highly accelerated life testing on mass flow controllers in temperature and vibration chambers, verifying product performance specifications and writing a life testing report
- Streamlined arduous data entry by coding Python scripts to aggregate raw data into Excel spreadsheets, decreasing routine data entry time

PROJECTS

Integration Lead & Treasurer

Boston, MA

Northeastern University Mars Rover Team (NUROVER)

September 2019 - Present

- Collaborated with Northeastern students to build a 50kg Mars rover to compete in the University Rover Challenge
- Implemented an imitative haptic controller for the rover arm shaped as a scaled-down model of the arm to increase operator intuition of arm location, resulting in significantly more dextrous control of the arm
- Designed a sheet metal rover frame that increased internal surface area by 34% and decreased weight by 17%
- Led the arm redesign effort, creating a 6 DoF robotic arm capable of lifting up to 6kg of weight at 0.9m away that features a differential miter gear wrist and twin lead screw gripper with interchangeable grips

SKILLS

Applications SolidWorks (CSWA), SolidWorks Simulation, HSMWorks, MATLAB, ANSYS Fluent, Fusion 360, Excel
Fabrication 3D Printing (FDM & SLA), CNC (Mill & Lathe), Manual (Mill & Lathe), Waterjetting, Laser Cutting
Languages Python, MATLAB, HTML / CSS, PHP, C
